

To the Hiring Team,

I am writing to highly recommend Sri Satya Sai Immani for a position with your team. I supervised Sri from January 2025 to June 2025 in his role as a Student Generative AI Research Assistant. At the time, we needed someone with the capacity, AI fluency, and enthusiasm to help us explore Gen AI tools that could be leveraged for teaching at our university.

Sri was responsible for researching a wide variety of popular and higher education-relevant Gen AI tools and reporting to university leadership on his findings. With minimal supervision, Sri conducted in-depth research on these tools, including practical faculty use cases, cost analyses, and potential concerns. He delivered regular presentations to university leadership, including the Vice Provost for Innovation and the Assistant Vice Presidents of Teaching and Learning Technologies and Client Experience, on how these tools could be utilized by our faculty. Our stakeholders were very pleased with his work and gained significant insight from his efforts.

Building on this research, Sri also contributed directly to Gen AI resources and faculty projects that required a blend of computer engineering skills and AI fluency. Sri used his programming background to update and redesign our Gen AI Playground via Microsoft SharePoint, which served as a centralized hub for faculty to explore and experiment with Gen AI tools and resources. He developed tools for faculty, such as a Gen AI tool that helps faculty save time by using an AI agent integrating National Library of Medicine image retrieval to quickly and easily develop questions for classes. He also developed a patient simulation using Gen AI to help Nursing students practice their skills interacting with patients.

Sri is a dedicated worker who asks thoughtful questions and seeks assistance when needed, and approaches unfamiliar areas with genuine interest. He met every new challenge with enthusiasm and optimism, consistently finding solutions by applying his skills to further the university's goals for Gen AI in teaching and learning.

I highly recommend Sri without hesitation; he brings amazing energy and a "can-do" spirit to any team. Please feel free to contact me if you have any questions or need further details.

Sincerely,

Indra Wangsawiredja
